

SSHOC-CH Association

The SSHOC-CH Association was founded on April 24, 2024 in Bern. Its role is to **create** and **run** the *Social Science & Humanities Open Cluster Switzerland* SSHOC-CH.

SSHOC-CH strives to **identify synergies** and **fostering collaborations** between the social sciences and humanities, and to build an **ecosystem of national infrastructures and expertise** supporting scholars from social sciences and humanities in their research and in managing their data in the spirit of Open Science and FAIR principles. Parallely, SSHOC-CH is active at the **research-policy interface** by contributing to the discussions about the Swiss Roadmap for research infrastructures and national ORD Strategy.

SSHOC-CH provides a framework for new research infrastructures, and complements existing infrastructures and their activities through co-operation and support, which are represented by a member of the SSHOC-CH Association. SSHOC-CH establishes the link to SSHOC at European level and to other national clusters.

Board of Directors:

- Georg Lutz, FORS, president
- Cristina Grisot, CLARIN-CH and DARIAH-CH, vice-president
- Rahel C. Ackermann, Inventar der Fundmünzen der Schweiz
