SSHOC-CH "National Infrastructure Roadmap" Info Event

Publication Date: 2024-11-26

SERI and swissuniversities have launched the process for the Swiss Roadmap for Research Infrastructures 2027. The Swiss Roadmap for Research Infrastructures is a report on the status and development of national and international research infrastructures. The roadmap process is highly relevant for all national projects seeking long-term institutionalization.

SSHOC-CH organizes an event with participation from SERI and swissuniversities **to inform the SSH community about the roadmap process and to answer questions.**

Time: Wednesday 11 December 2024
(13:00-14:00)

Location: Zoom

Please register to the event: https://forms.gle/36yhEBqQzV6WMA2X6

During the event, we would also like to include a slot on informing about **potential submissions from the SSH domain**. If you wish to share this information with others, please submit information on potential project proposals (Titel/topic as well as institutions and people involved) until 9 December to Georg Lutz. This will allow us to inform participants about the ongoing efforts.

Relevant documentation:

- Link to SERI website
- Link to swissuniversities website where the you can download the process outline and the

selection criteria
